

Historically Underutilized Business Program

2017 Bond Program Ancillary HUB Spend for Goods and Other Services

As the HUB Program department continues to enhance the functionality of our reporting software to better suit our Program needs, we aligned our B2GNOW data with the CBOC HUB report, allowing for more transparency of total HUB spend. This process resulted in identifying significant spend in goods and other services provided by HUB vendors that directly support the 2017 Bond Program activity.

The HUB department notes that there are various procurement delivery methods used to select vendors for these services. Each procurement method has specific HUB compliance requirements to assist with meeting overall HUB goals.

Moving forward the HUB department intends to continue to closely track and report on the ancillary HUB spend that supports the 2017 Bond Program. The categories below does not reflect total spend to date.
